

Discussion Questions: FAIR and Open Science Activity

1. What challenges or cultural barriers may you face when you try to implement open research and FAIR data practices into your daily work?
2. Are there any potential downsides or risks for you associated with open research and FAIR data practices?
3. What are the personal and societal benefits you expect to gain from adopting open research and FAIR data practices?
4. How can your research institution provide support for your adoption of open research and FAIR data practices?
5. What ethical and legal considerations should be taken into account when it comes to open research and (FAIR) data sharing?
6. How much additional effort would be required to enhance the openness and FAIRness of your research practices?
7. How might open research and FAIR data practices evolve in the coming years, and how can you prepare for these changes?
